

Creating a Picture Map

On the back of this paper you will see a blank map of China and its surrounding countries. Using a computer, find three pictures to place correctly on the map that accurately show a portion of China's wide range of land masses. Use pages 521 and 522 in your textbook to help by searching key physical geography terms that are displayed on these pages.

Part 1: Go to the website www.google.com and click on the images search.

Use pages 521 and 522 in your textbook to find various landforms of China to search.

Choose **THREE** (3) different landforms to search and select their pictures. On the map on the back of this paper, do your best to draw the physical feature you've selected. Be sure to correctly place the physical features on the map.

Part 2: Write a complete paragraph to answer the following question on the bottom of this page:

How does the physical geography of China affect the people who live there?

Be sure to talk about the land and climate and their affect on the people. Also discuss also the land/ physical geography of China affects where people live within the country. Finally, make sure you discuss how the physical geography affects the Chinese citizens' survival. What do they have to do different to survive than someone living in the Middle East?
