

Making a Physical Map of America

On the back of this paper you will find a blank map of the United States. Your goal is to make a physical map of the United States using a color coded key. You decide the colors to use in your scale – but make sure your map is readable. Each color will represent a range of elevation. After creating your physical map, use the space below to compose 7 questions – 3 “True/False” questions and 4 “open ended” questions. Make sure you know the answers to your own questions as we will be using them in class.

1.

2.

3.

4.

5.

6.
