

Bell Ringer: Hot Chalk

What factors cause the spread of germs?

Do you think any of the conditions you mentioned exist in Africa?

One of the biggest problems in Africa is the spread of a deadly virus called "AIDS".

What is AIDS?

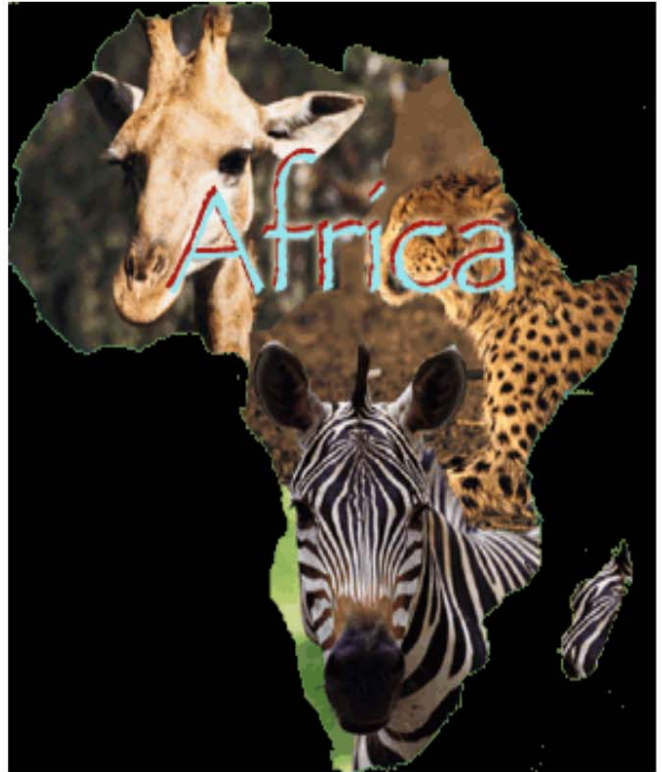

The problem with this disease mixed with the conditions in Africa is that it allows other diseases to thrive throughout the people of Africa.

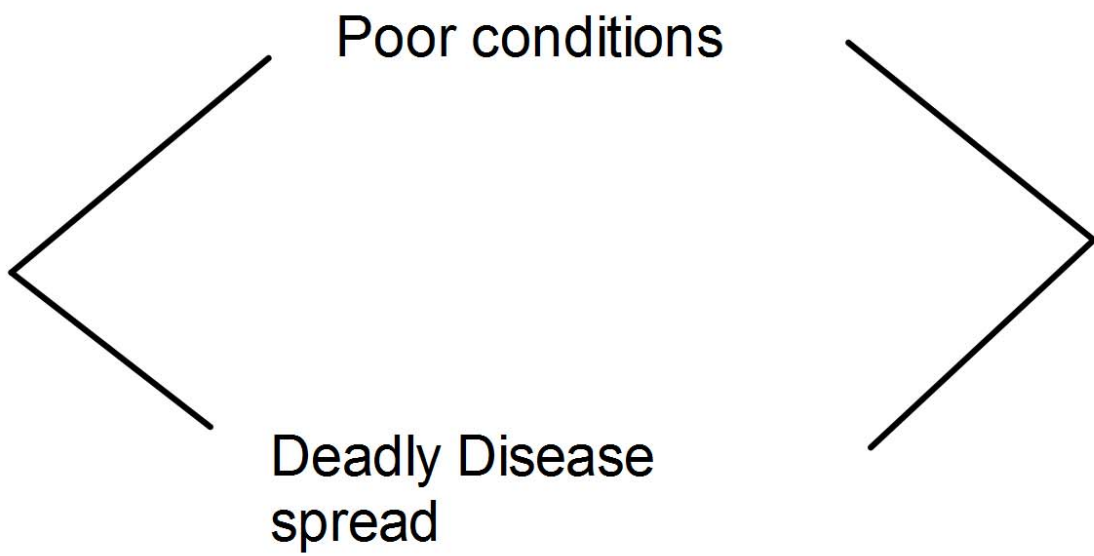

One of these is Tuberculosis

AKA

TB

The Deadly Cycle...

Write a paragraph with an answer to the question...

How can we break this cycle?

Should the United States become involved?

How can this problem affect the world?
